

# Product Information Sheet

Nanoflex® Clear View

Specification	
Chemical basis:	modified silicon dioxide
Layer thickness:	approx. 150 nm
Water resistance:	approx. 95° (20µl)
Oil resistance:	no
Slip angle:	< 10°
Temperature stability:	100°C permanent
Chemical stability:	between pH 3 and pH 9
Weather resistance:	500 h pursuant to ISO 11507 A
Durability (mechanical):	> 1000 cycles pursuant to ISO 11998
Salt water resistant:	yes
Transparency:	100%

## Product Information Sheet

Storage stability: 2 years

Temperature sensitivity: -3°C to 30°C

Consumption: 15 ml/m<sup>2</sup> (diluted concentrate)

Application: Simple spray-on application is all that's required. When used in windscreen washers, the wipers disperse the product across the windscreen, streak-free.

Standard unit sizes: 1,5,20,200,960 l  
bespoke own labelling fulfilment service

Nanoflex<sup>®</sup> Clear View is a concentrate, for use in windscreen washers, dilutions of 1% in an ethanol-water mixture (10/90) is recommended. The concentrate is a hazardous material according to ADR and IATA.

Please observe the relevant safety data sheet when using Nanoflex<sup>®</sup> Clear View.
