

Product Information Sheet

Nanoflex® PRE 440

Specification	
Chemical basis:	modified silicon dioxide
Layer thickness:	not applicable
Water resistance:	not applicable
Oil resistance:	not applicable
Slip angle:	not applicable
Temperature stability:	200°C permanent
Chemical stability:	between pH 1 and pH 14
Weather resistance:	3500h pursuant to ISO 11507 A
Durability (mechanical):	very high
Salt water resistant:	yes
Transparency:	100%

Product Information Sheet

Storage stability: 2 years

Temperature sensitivity: -3°C to 30°C

Consumption: 500 - 1000 ml/m²

Application: The liquid is poured generously onto the surface without applying pressure. The coating is waterproof after approx. 24 hours and fully cured after 5 days.

Standard unit sizes: 1,5,20,200,960 l
bespoke own labelling fulfilment service
